PROFESSIONAL SUMMARY

Power BI Developer and Data Analyst with 3.5+ years of experience in business intelligence, KPI reporting, operational analytics, and data validation. Strong in SQL, Python, Power BI, DAX, Power Query, Excel, and Microsoft Fabric, with proven skills in Star Schema modeling, ETL, Row-Level Security (RLS), root-cause analysis, and data reconciliation. Applies generative AI and AI-driven analytics, including Microsoft Copilot in Power BI, Power BI AI visuals, AI-ready semantic models, LLM-assisted SQL/DAX/Python development, and prompt engineering, to automate insight generation, accelerate delivery, and turn complex data into clear recommendations for Sales, Finance, Operations, and Telecom stakeholders. Validates all AI output for accuracy before release.

SKILLS

Analyst: Power BI Developer | Data Analyst | Power BI | DAX | Microsoft Fabric | Copilot in Power BI | Business Intelligence & Dashboards | KPI & Performance Analytics | Semantic Modeling (Star Schema)

Database: SQL | SQL Data Analysis | SQL Server | MySQL

Programming: Python | Python Data Automation

AI: Generative AI | AI-Powered Analytics | AI-Assisted Development | Automated Insights

Analysis & Soft Skills: Root Cause Analysis | Data Quality & Reconciliation | Data Storytelling | Stakeholder Collaboration

TECHNICAL SKILLS

Generative AI & Copilot: Microsoft Copilot in Power BI, Generative AI for Analytics, Prompt Engineering, LLM-Assisted SQL / DAX / Python Development (ChatGPT, Claude, GitHub Copilot), AI Output Validation, Responsible AI Practices

AI-Driven Analytics: Power BI AI Visuals (Key Influencers, Decomposition Tree, Smart Narratives, Anomaly Detection, Q&A), Forecasting, Natural Language Q&A, Automated Insights, AI-Ready Semantic Models (descriptions, synonyms, Q&A setup), Microsoft Fabric

Business Intelligence: Power BI Desktop, Power BI Service, Dashboard Development, KPI Reporting, Executive Reporting, Data Visualization, Drill-Through, Bookmarks, Scheduled Refresh, Gateway Monitoring

SQL & Databases: SQL Server, MySQL, Complex Joins, CTEs, Subqueries, Window Functions, Aggregate Functions, Views, Stored Procedures, Triggers, Indexes, Temp Tables, Query Optimization

Python & Automation: Python Data Analysis, Pandas, NumPy, Exploratory Data Analysis, openpyxl, Workbook Automation, Data Processing, Data Validation

DAX: Measures, Calculated Columns, Time Intelligence, KPI Calculations, YoY Analysis, Variables, Filter Context

ETL & Data Modeling: Power Query (M), Data Cleaning, Data Transformation, Data Integration, ETL Workflows, Star Schema, Snowflake Schema, Dimensional Modeling, Data Warehousing

Analytical Methods: Trend Analysis, Pattern Analysis, Variance Analysis, Discrepancy Analysis, Hypothesis-Driven Analysis, Root Cause Analysis, SLA and MTTR Analytics, Ageing Analysis

Security & Quality: Row-Level Security (RLS), Data Validation, Reconciliation, UAT, Performance Optimization

Tools: Microsoft Excel, PowerPoint, Git / GitHub (Version Control)

PROFESSIONAL EXPERIENCE

Power BI Developer & Data Analyst | WNS Global Services

2023 – 2026

- Designed and developed interactive Power BI dashboards for Sales, Finance, and Operations teams, improving reporting efficiency by 30%.
- Built optimized Star Schema models and advanced DAX measures (Time Intelligence, KPIs, YoY), improving KPI reporting accuracy by 25%.
- Reduced dashboard refresh time by 20% through query tuning and optimized Power Query transformations over SQL and Excel sources.
- Used SQL and Excel to extract, validate, and analyze large datasets for daily, weekly, monthly, and ad hoc reporting across Telecom, Network, and Systems operations.
- Created Monthly Business Review (MBR) packages with executive dashboards, KPI scorecards, MTTR analytics, ageing analysis, and performance trends.
- Performed trend and root-cause analysis to identify recurring incidents, SLA degradation, ageing issues, and operational performance gaps.
- Investigated duplicate records, timestamp inconsistencies, and source-data variances before reporting results to stakeholders.
- Applied Power BI AI visuals (Key Influencers, Decomposition Tree, Smart Narratives) and Microsoft Copilot to accelerate insight discovery, narrative summaries, and DAX/SQL drafting.
- Prepared semantic models for Copilot and Q&A with clear naming, descriptions, and synonyms, and validated AI-generated SQL/DAX against source data before release.
- Implemented Row-Level Security (RLS) to secure reports across multiple departments.

- Translated business requirements into KPIs, dashboards, and performance metrics; delivered insights and recommendations to cross-functional stakeholders.
- Published reports to Power BI Service, scheduled refreshes, monitored the gateway, and supported UAT, deployment, and troubleshooting.

PROJECTS

IT Operations & Vendor Performance Analytics | Power BI, SQL, Python, Excel, Power Query

- Built an automated scorecard framework from raw ITSM data to measure operational performance against contractual SLAs.
- Reconciled internal logs with third-party vendor records to surface data discrepancies, performance variations, and data-quality issues.
- Automated daily workbook updates with Python and openpyxl, including row-count and timestamp validation.
- Identified chronic incident patterns and declining performance trends for monthly governance and management reviews; standardized KPI calculations across reports.

Inventory Management Dashboard | Power BI, SQL, DAX, Power Query

- Built an end-to-end dashboard that reduced stock-out risk by 25% and improved replenishment planning efficiency by 30% through real-time inventory visibility.
- Designed a Star Schema integrating SQL and Excel; created DAX KPIs (Inventory Turnover, Carrying Cost, Reorder Level, Stock Availability) and automated Power Query ETL.

Sales Performance & Profitability Dashboard | Power BI, DAX, RLS, AI Visuals

- Developed DAX measures for Gross Profit Margin, YoY Growth, Sales Growth, and Revenue KPIs, with RLS and drill-through for secure, detailed reporting.
- Applied Key Influencers and Smart Narratives to explain drivers behind revenue and margin changes.
- Increased operational efficiency by 22% through automated reporting and KPI monitoring.

EDUCATION

Bachelor of Management Studies Annamalai University, Chennai CGPA: 7.0	Jun 2019 – May 2022
Intermediate (MPC) Sri Chaitanya Junior College CGPA: 6.8	2019
SSC Ravindra Bharathi School CGPA: 7.0	2017
